

AMENDMENTS TO THE DRAWINGS:

Although formal drawings were filed with the U.S. Patent and Trademark Office on September 22, 2000, the Office Action included a Notice of Draftsperson's Patent Drawing Review with objections to the drawings that were filed on March 22, 2000.

Attached to this response are marked up drawing sheets for FIGURES 1, 2, 3, 4, and 14a, showing amendments requested by this response, relative to the formal drawings that were filed on September 22, 2000. For FIGURE 1, reference number 58 has been changed to 57, to avoid a duplication of reference numbers. For FIGURE 2, reference number 68 has been changed to 69, to avoid a duplication of reference numbers. For FIGURE 3, reference numbers 106 and 108 have been changed to 105 and 107, respectively, to avoid a duplication of reference numbers.

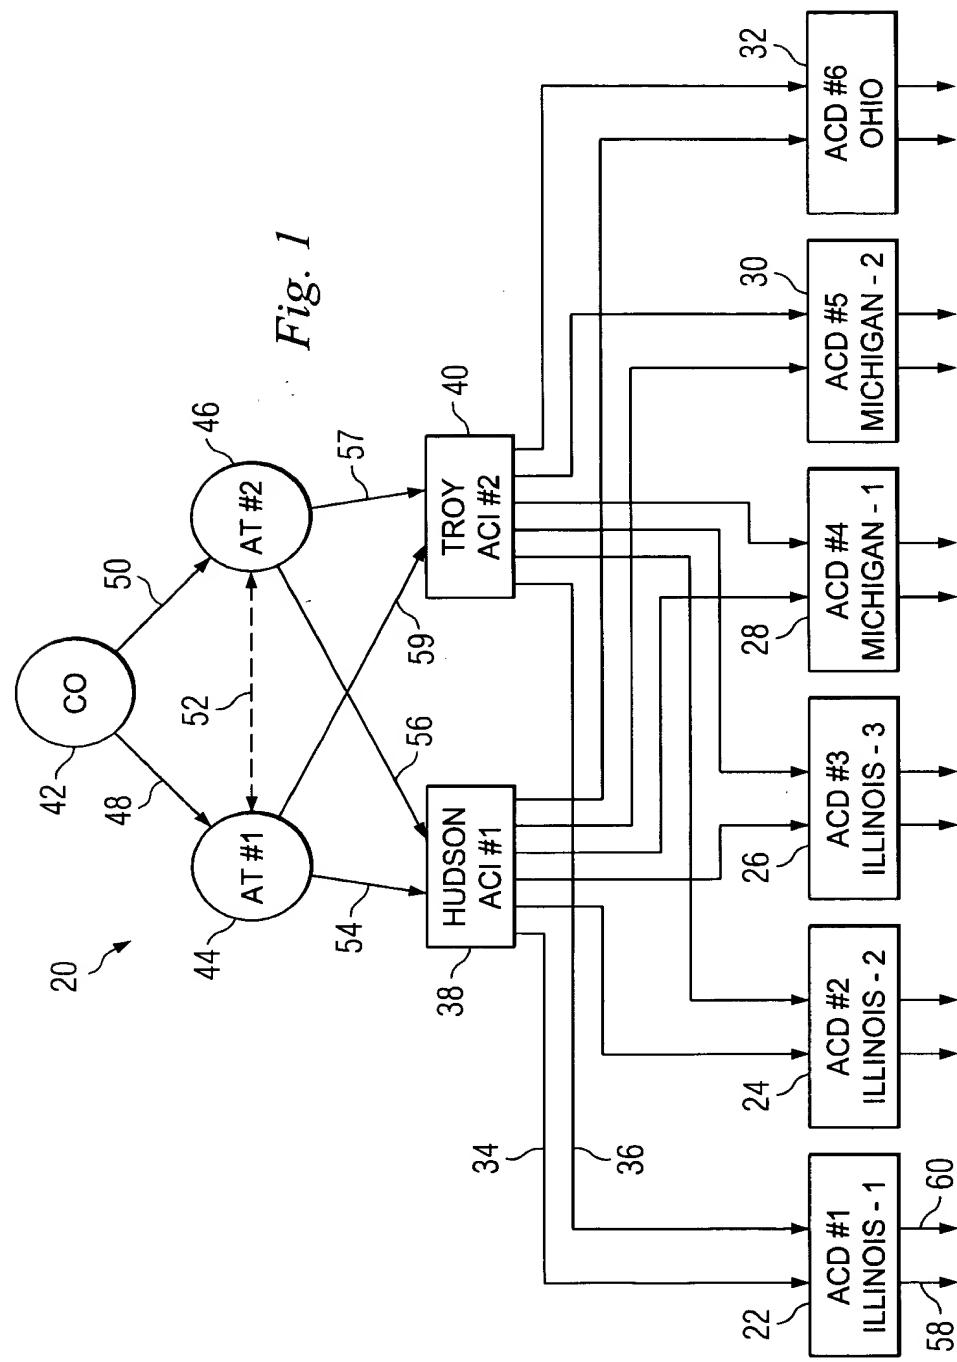

For FIGURE 4, two marked up pages are attached, one based on the formal drawings, and the other based on the informal drawings. Those two pages are marked to show the text from the informal drawings that is being added to the formal drawings. That text was included in the original drawings that were filed with the application, but the text was inadvertently omitted from the formal drawings that were filed on September 22, 2000. For FIGURE 14a, reference number 280 has been changed to 281, to avoid a duplication of reference numbers.

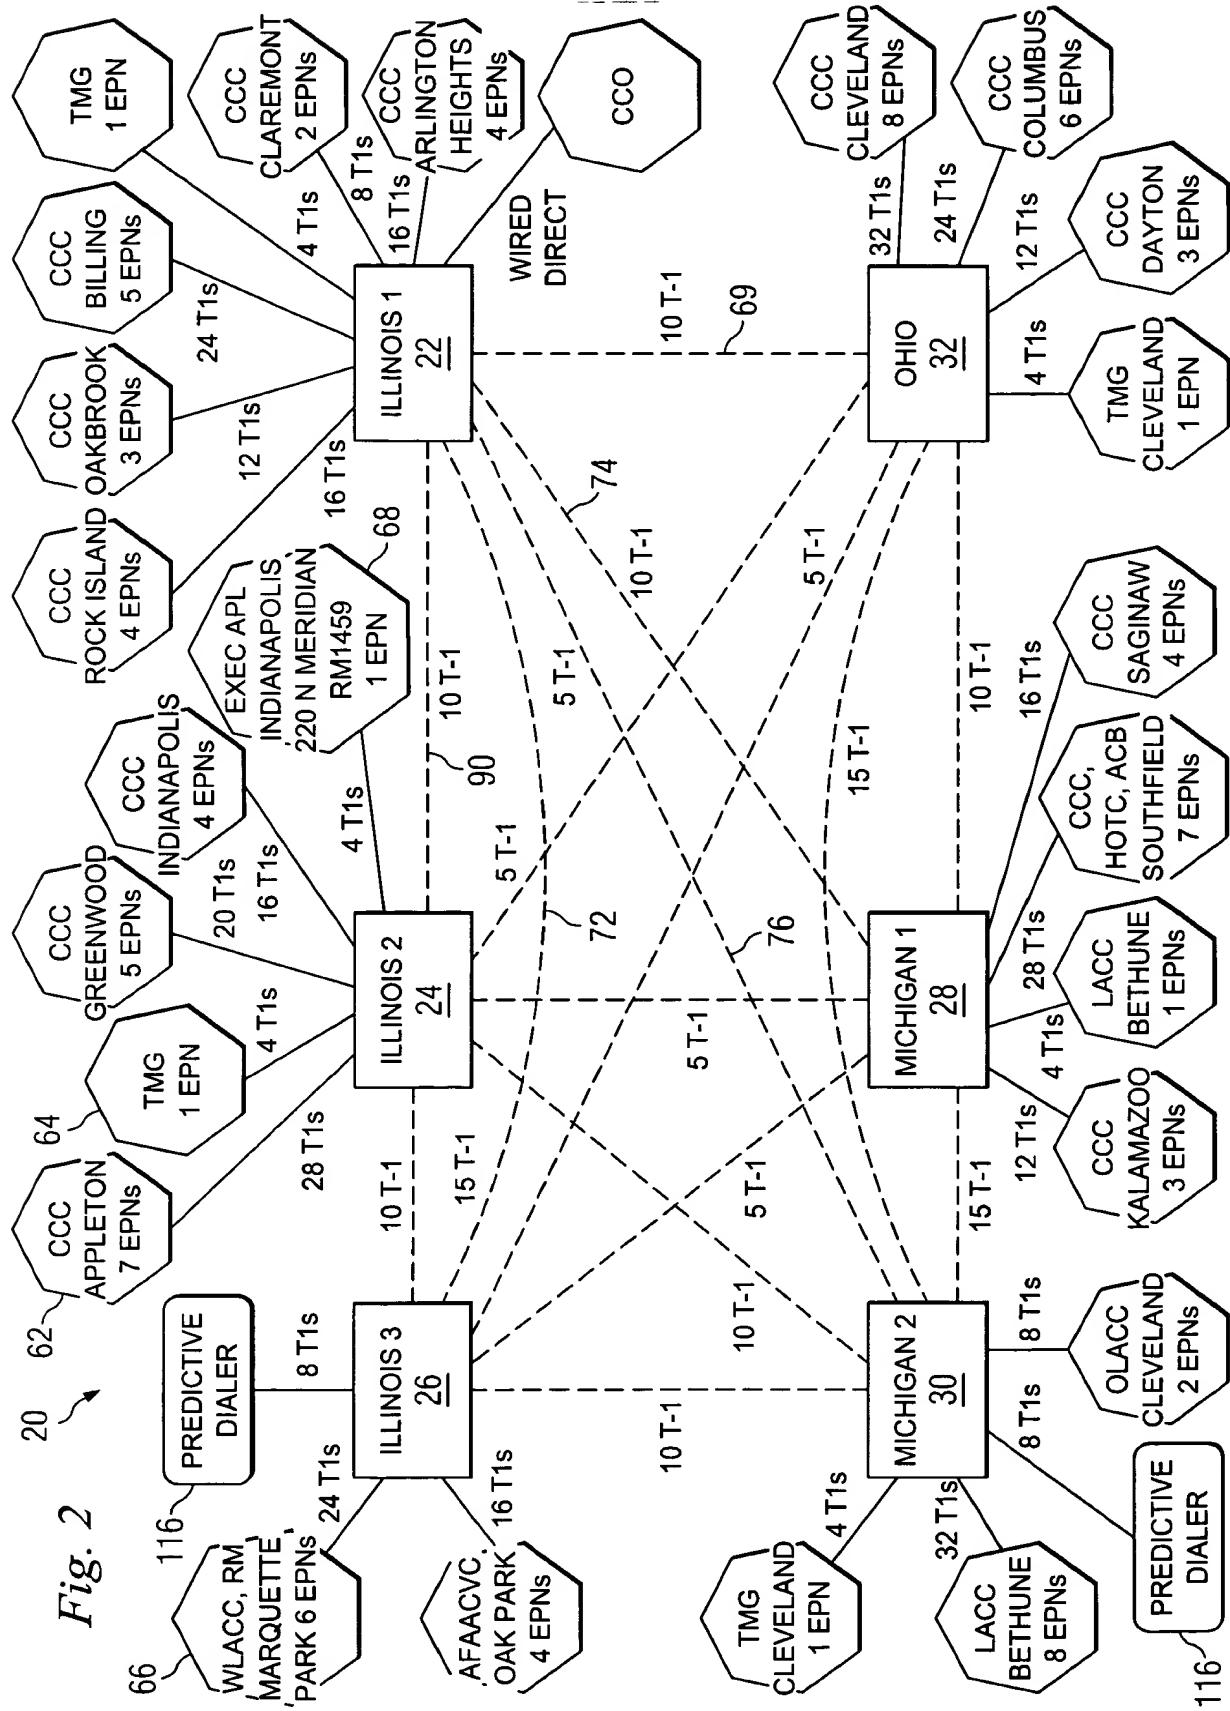

Since the Draftsperson's Review was not based on the formal drawings that were filed on September 22, 2000, a full set of formal drawings is also attached, including FIGURES 1-20 on 20 pages. Those 20 pages include FIGURES 1, 2, 3, 4, 12, 14a, and 18, amended as shown in the marked up sheets referenced above, and labeled as "replacement sheets." The remaining sheets of formal drawings are not labeled as "replacement sheets," because those sheets are identical to the sheets submitted on September 22, 2000.

Also attached is a printout from the PTO PAIR system, showing that papers pertaining to the drawings were received by the PTO on September 25, 2000.
